شكلك

ARTWORK FOR SUPPLIERS

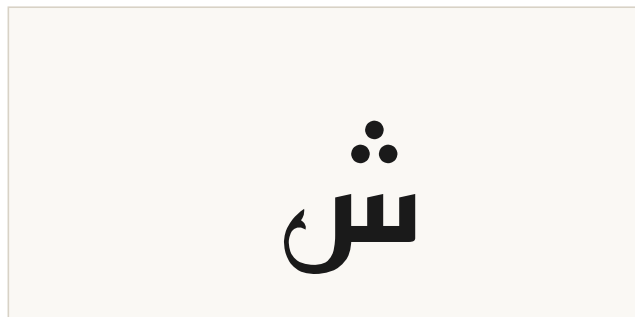

Everything needed to quote and print. No fonts required.

THE TWO MARKS

The wordmark

Name, gold rule, Arabic. The three pieces are centred on each other and never move apart. This is the logo.

The monogram

The Arabic letter sheen, the first letter of the name. For anything too small for the wordmark, and the only mark that can be embroidered.

WHICH MARK GOES ON WHICH ITEM

ITEM	MARK	FILE	NOTE
Linen drawstring bag	Wordmark, one colour	shaklek-logo-one-colour	Screen print. Ink to match the gold, or black.
Woven brand label	Wordmark, colour	shaklek-logo	Weaving holds fine detail. No size, no care text here.
Care label	Monogram	shaklek-monogram	Small. Fibre, care symbols and origin sit beside it.
Hang tag	Wordmark, colour	shaklek-logo	Double sided. Mark front, the three values back. No variable data.
Thank-you card	Wordmark, colour	shaklek-logo	Landscape, to match the envelope. Double sided, letterpress or foil.
Envelope	Monogram	shaklek-monogram	C6 landscape, wallet flap. Back only, 9 mm below the flap point.
Business card	Wordmark reversed	shaklek-logo-white-on-dark	Ink front, cream back with a QR. The only item with bleed.
Tissue seal sticker	Seal	shaklek-gold-seal	Gold circle, cream mark.
Tissue wrap	Wordmark, one colour	shaklek-logo-one-colour	Light repeat. Keep it faint.
Mailer	Monogram, small	shaklek-monogram	Understated: a branded parcel advertises what is worth stealing.
Paper bag	Wordmark, one colour	shaklek-logo-one-colour	Hand-over only. Not used for courier orders.
Embroidery, anywhere	Monogram ONLY	shaklek-monogram.pdf	See the note on page 4. The Latin cannot be stitched.

EVERY ITEM, EVERY DIMENSION

Everything below is a finished size in millimetres. Each one has a print-ready file in the artwork folder at exactly that size, with the marks and the wording already placed. Quantities are a first run and are indicative — please quote your own price breaks.

ITEM	FINISHED SIZE (MM)	MATERIAL	PRINT	QTY
Linen drawstring bag 08-linen-bag-print	500 x 400 (LANDSCAPE)	Cotton or linen, natural	Screen print, 1 colour	100–200
Woven brand label 01-woven-brand-label	45 x 18	Woven, folded ends	Woven	500
Care label 02-care-label	25 x 45	Satin, side seam	Printed	200
Hang tag 03-hang-tag + 03b-hang-tag-back	50 x 90	Uncoated card, 300 gsm	Print both sides	500
Thank-you card 04-thank-you-card-front + 05-thank-you-card-back	148 x 105 (A6, LANDSCAPE)	Uncoated, 300 gsm	Letterpress or foil	200
Envelope 05b-thank-you-envelope-back	162 x 114 (C6, LANDSCAPE)	Uncoated, to match the card	Back only, 1 colour	200
Business card 10-business-card-front + 10b-business-card-back	90 x 50 trim, 96 x 56 with bleed	Uncoated, 350 gsm	Print both sides	200–500
Tissue seal sticker 06-tissue-seal-40mm	40 diameter	Matt sticker, gold ground	1 colour on gold	500
Tissue wrap sheet 07-tissue-wrap-repeat-tile	500 x 700 (tile is 250 x 250)	Unbleached tissue, 17 gsm	Step and repeat, faint	500
Mailer 09-mailer-placement	320 x 400 internal, MINIMUM	Kraft paper, 120 gsm+, self-seal	1 colour, small	200

THREE NOTES ON THE SIZES ABOVE

The envelope is C6, and it is LANDSCAPE: 162 wide, 114 tall.

It must be a WALLET envelope — flap hinged on the long edge, pointed, opening across the top — which is the card and invitation format. A pocket envelope is the same C6 sheet with the flap on the short edge, used portrait, and it is what invoices and statements come in. Same paper, same price, wrong object. THE CARD IS LANDSCAPE TOO, 148 x 105, so it slides straight in and comes straight out the right way up — about 7 mm of clearance along the long edge and 4.5 mm along the short one. A portrait card would have to be turned ninety degrees to go in and turned back to be read, which is a small constant awkwardness in the one moment the unboxing is meant to feel considered. C6 is a shelf size everywhere, so there is no die to pay for. THE FRONT PRINTS NOTHING — this envelope never travels on its own, it sits inside the bag inside the mailer, so it needs no address panel and no stamp box. The monogram sits on the back, 9 mm, centred below the point of the flap and not on the flap itself: on a gummed flap the ink meets the adhesive, and under a self-seal strip it is covered.

The mailer size is a MINIMUM, not a specification.

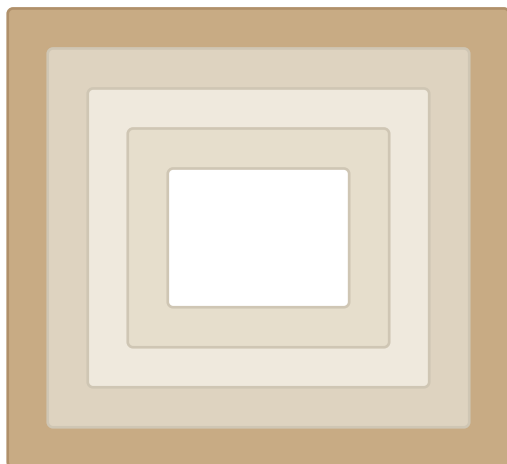

320 x 400 mm internal is what the contents need: a folded garment is about 300 x 220 x 40 mm, and it goes inside a 50 x 40 cm cotton bag that folds to roughly 300 x 250 mm with loft, plus tissue, a card and a tag. Your nearest stock size at or above that is the right answer and the cheapest one — please do not cut a custom size for this. The artwork is a placement guide and the monogram is fixed in millimetres from the lower-right corner, so it stays correct whatever bag size you use.

The business card is the only item supplied with bleed.

Both card files measure 96 x 56 mm because 3 mm is included on every edge. Trim to 90 x 50. The front prints edge to edge in near-black and without that bleed a small drift on the guillotine leaves a white line down one side. No crop marks are needed.

HOW THE PARCEL GOES TOGETHER

Five layers, outside in. This answers a question we were asked and should have answered here first: the kraft is the outer mailer, not a wrapping paper. Nothing is wrapped in kraft. The paper against the garment is unbleached tissue.

- 1 Kraft mailer**
320 x 400 mm minimum, kraft paper 120 gsm or heavier, self-seal strip. The only layer the courier touches, and the only one the customer throws away. Small monogram, nothing else.
- 2 Linen drawstring bag**
50 x 40 cm, LANDSCAPE — wider than it is tall. Wordmark screen printed. THIS IS THE BOX. It is what she keeps and reuses, and it is the reason there is no rigid box in this list.
- 3 Tissue wrap**
Two sheets of unbleached tissue, 50 x 70 cm, faint wordmark repeat, closed with the 40 mm gold seal. This is the paper that touches the cloth.
- 4 The garment**
Folded. Woven brand label at the neck or waistband, small satin care label at the side seam, hang tag on cotton string.
- 5 Thank-you card in its C6 envelope**
Tucked inside the linen bag alongside the garment, with a business card. The card is handwritten, which is the whole point of it.

IS KRAFT PAPER STURDY ENOUGH? YES, AND HERE IS THE SPECIFICATION

A folded garment is soft goods: no corners, nothing rigid, nothing to crush. Kraft paper mailers are the normal choice for clothing and the failure is never the panel — it is the seal opening or an edge tearing in a sorting machine. So the specification is about the seal and the weight, not about padding:

Weight	120 gsm or heavier. Below that it tears at the fold.
Closure	Self-seal strip, full width. Tape across a paper mailer peels in the heat.
Lining	None. Padded or honeycomb linings are for fragile goods; they add bulk, cost and courier weight and do nothing for folded cloth.
If in doubt	Recycled poly is tougher and cheaper, and we do not want it: plastic contradicts the whole brand. Send us a sample of your 120 gsm kraft and we will decide on the real thing.

COLOUR

Ink

#1A1A1A

CMYK 0 / 0 / 0 / 100

100% K for the mark. Rich black only on large solids.

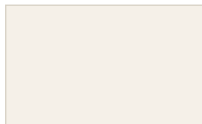

Gold

#9C8445

CMYK 0 / 15 / 56 / 39

Used on the rule and the seal, nowhere else.

Cream

#F5F0E8

CMYK 1 / 3 / 7 / 0

The mark reversed out of the gold seal.

The CMYK figures are a straight conversion and a starting point, not a specification. Gold shifts hard between coated paper, uncoated card, kraft and cloth, so please send a physical proof on the actual stock before any run. If you work in Pantone, propose a match against the printed proof rather than against the hex value.

MINIMUM SIZE AND CLEAR SPACE

Clear space on every side is the cap height of the wordmark: the height of the S. Nothing else prints inside the dashed line.

Minimum sizes

Wordmark 28 mm wide printed, 35 mm woven

Monogram 9 mm. Seal 30 mm diameter

PROCESSES: WHAT WORKS AND WHAT DOES NOT

Woven label	YES	Weaving resolves finer detail than any other process here.
Screen print	YES	Holds the thin strokes at bag scale.
Letterpress / foil	YES	Fine lines are what these processes are for.
Hot stamp on kraft	PROOF FIRST	Kraft is rough. Ask for a proof on the real stock.
EMBROIDERY of the wordmark	NO	Satin stitch needs about 1–1.5 mm of stroke. On a 35 mm wordmark the thin strokes are near 0.2 mm, so they will not stitch, and thickening them changes the mark.
EMBROIDERY of the monogram	YES	Even strokes, no hairlines. Stitches cleanly at any size on any cloth. Use shaklek-monogram.pdf.

THE FILES

SVG and PDF are vector: use these. PNG is transparent, for anything that cannot take vector. JPG is flattened onto white, or onto black for the reversed versions, for systems that cannot take transparency.

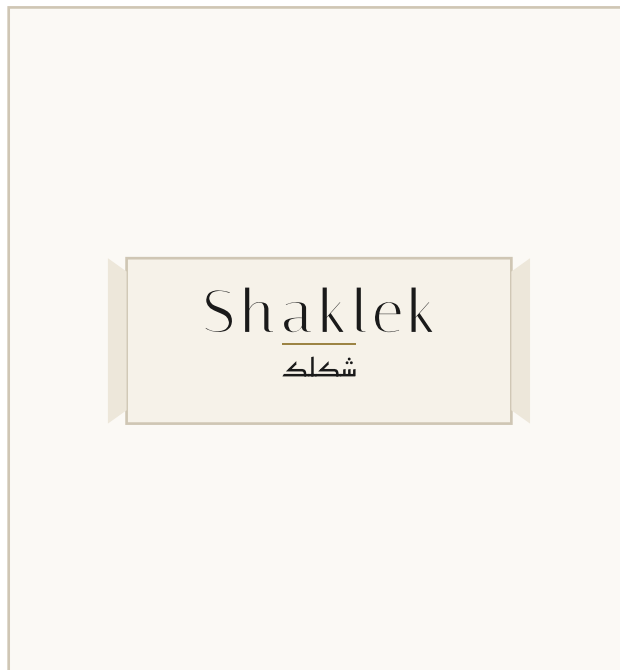

Every file has its text converted to outlines. Nothing needs a font installed and nothing can be substituted. Please do not retype the name in a font. The artwork is the only correct version of it.

WHAT GOES ON WHAT, DRAWN TO PROPORTION

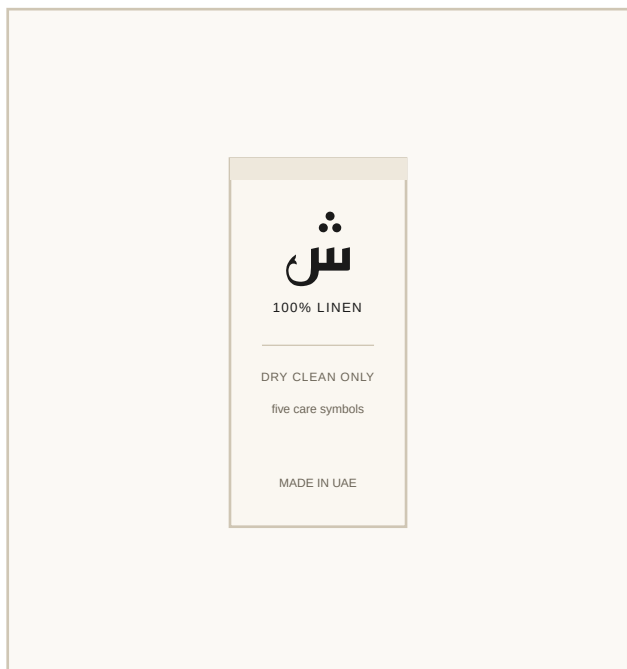

Linen drawstring bag

500 x 400 mm, LANDSCAPE — wider than it is tall. Cotton or linen, drawstring. Wordmark centred, one colour, 110 mm wide, at a third of the bag height. This is what replaces a box — she keeps it and reuses it. File: 08-linen-bag-print

Woven brand label

45 x 18 mm, woven, folded ends, sewn at the neck or waistband. Wordmark only. NO SIZE AND NO CARE TEXT on this one — that lives on the separate care label. File: 01-woven-brand-label

Care label

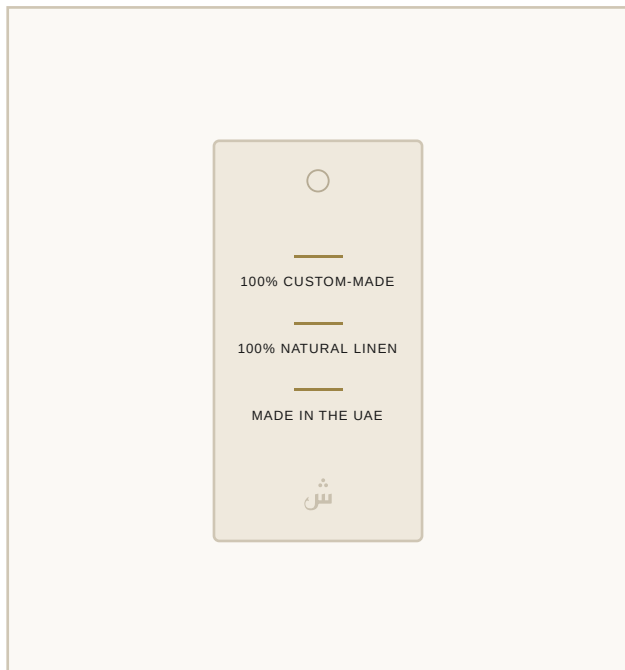

25 x 45 mm, satin, sewn to the SIDE SEAM so the brand label stays clean. Monogram, then fibre, care symbols, origin, in English and Arabic. File: 02-care-label

Hang tag, front

50 x 90 mm, uncoated card 300 gsm, cotton string. Wordmark in the upper half, web address below the rule. NO order number — this is plain bulk stock, no variable data. File: 03-hang-tag

WHAT GOES ON WHAT, CONTINUED

Hang tag, back

The same card, printed on the reverse: three values, each on a gold hairline, monogram at the foot. Printing both sides of one tag costs almost nothing more than one side and saves a separate insert. File: 03b-hang-tag-back

Thank-you card

148 x 105 mm — A6 LANDSCAPE, matching the envelope so it slides straight in. Uncoated 300 gsm, letterpress or foil. Wordmark top, a printed line, then ruled guides she writes on by hand. Returns and a QR on the back. Files: 04 and 05

Envelope

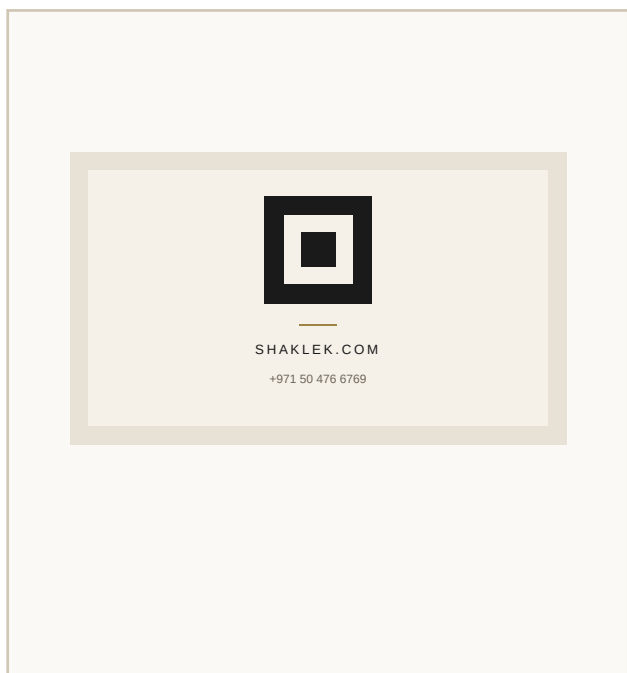

C6 LANDSCAPE, 162 x 114 mm — a WALLET envelope, flap hinged on the LONG edge, not a portrait pocket one. The tinted triangle is the flap and does not print. Monogram 9 mm below the flap point, never on the flap. THE FRONT PRINTS NOTHING. File: 05b-thank-you-envelope-back

Business card, front

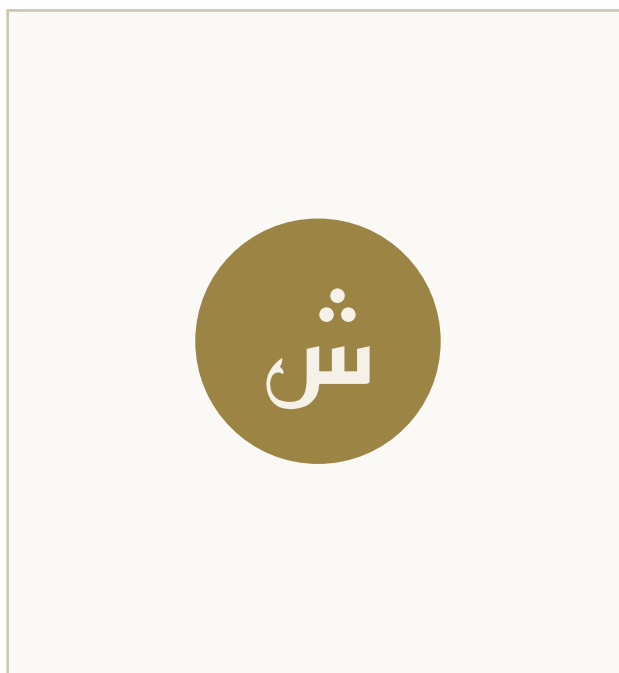

90 x 50 mm trim, supplied at 96 x 56 mm with 3 mm of bleed on every edge — the ONLY item here with bleed. Uncoated 350 gsm. Prints edge to edge in near-black with the mark reversed out in cream and gold. File: 10-business-card-front

WHAT GOES ON WHAT, CONTINUED

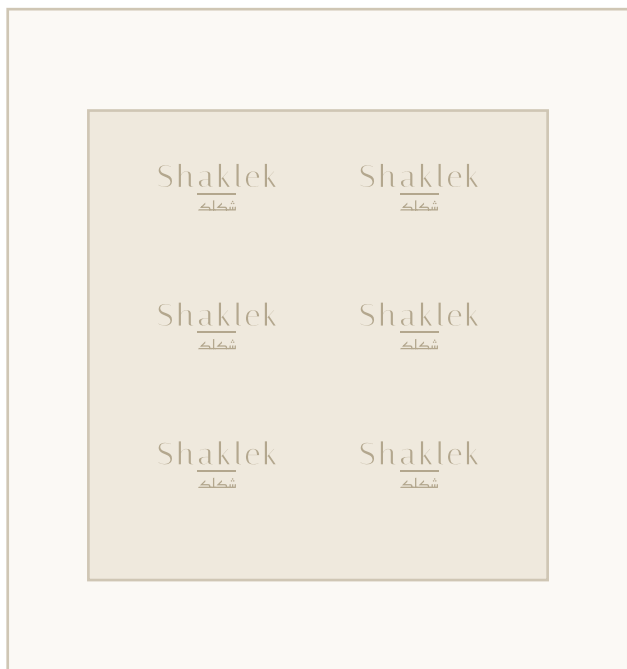

Business card, back

Cream ground, QR to the website, then the address, phone and email. PRINT THE QR EXACTLY AS SUPPLIED: do not redraw, rescale one axis, or crop the blank margin — that margin is part of the code and phones stop reading it. File: 10b-business-card-back

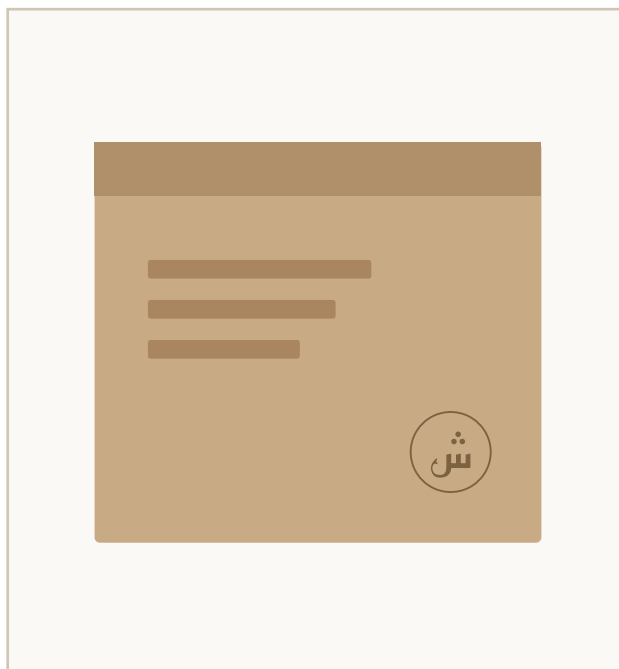

Tissue seal sticker

40 mm diameter, matt sticker, gold ground with the mark reversed out in cream. Closes the tissue wrap and seals the linen bag. File: 06-tissue-seal-40mm

Tissue wrap

Sheet 500 x 700 mm, unbleached tissue 17 gsm, two sheets per garment. The file is ONE 250 x 250 mm tile — step and repeat it across the sheet. Keep it faint: it should read as texture, not as print. File: 07-tissue-wrap-repeat-tile

Mailer

Kraft paper, 120 gsm+, self-seal. MINIMUM 320 x 400 mm internal — your nearest stock size at or above that is fine, no custom size needed. Monogram only, 11 mm, 34 mm from the right edge and 28 mm up. Nothing else prints outside. File: 09-mailer-placement
